

# L'Opportune

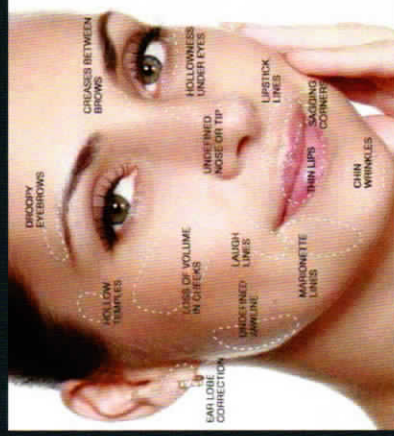

## FURTHER INFORMATION

### BOTOX

Botox treatment is proven to work well to restore your natural beauty. It will only take moments of your time in a pleasant and supportive environment away from the hustle and bustle of your everyday life. Administered by Dr Melinda Pascoe herself, Botox is a natural, purified protein that relaxes wrinkle-causing muscles. Botox can last up to four months before lines slowly begin to return. Dr Pascoe will ensure that repeat treatments are performed within a time frame that will limit the return of lines.

### FILLER

Filler injectables have been dubbed the surgery-free face lift, working to lift and shape without giving an obvious 'done' look. Filler stimulates the skins natural hydration and collagen production helping to improve elasticity and tightens the skin to provide further lift.
